

IO2.A – GUIDELINES TO IMPLEMENT THE STORYTELLING ACTIVITIES AND COLLECT THE VISUAL SOURCES

LA SORGENTE MIRACOLOSA

In each country, project partners' experts will cooperate with the teachers and with pupils' families asking them to tell traditional tales during classroom activities.

Every project partner will coordinate the activities of 5 kindergartens each represented by 2 preschool teachers, a class of at least 15 children and 6 representatives (parents/grandparents/family caregivers) of the families of the children.

The tales will represent both the local traditions of the area in which the kindergarten is located and the traditions of those pupils who are part of other countries/ethnic/religious backgrounds.

Once the tales are identified the parents/grandparents/family caregivers will tell the stories to the class and the children will be asked to produce drawings/collages/clay models representing their understanding of the story plot.

From 3 to 6 stories should be collected for each Kindergarten involved. That is a total of 15 to 30 per partner.

For every tale the project partners' experts will collect and provide the following information:

- Tale description
- Collection of photos of the drawings/collages/clay models
- **If possible: Photos, Audio, Video of the activity**

Title of the Tale	LA SORGENTE MIRACOLOSA
Name of the Kindergarten	SCUOLA DELL'INFANZIA PESTALOZZI LIVORNO
Tale typology	<input type="checkbox"/> Intercultural traditions
Story teller	<input type="checkbox"/> Parent
Tale summary	<i>The miracoleus source. There is a footway in the old wood where the tweet of the birds made a wonderful song. Under the shadow of the trees there are beautiful flowers and a green carpet. Allium ursinum is a medical plant, it grew in a wet soil. At the end of a hill there is a cave, inside it there is a source. The water is rich of minerals. One day a halting shepherd reached the cave with his sheep. He stopped the flock and he washed his ill foot under the water, he slept nearby and when he woke up he was healed. It was a miracle! The new reached many people and the person who had walking problems went to the source and became healthy. Doctors and scientists advised ill people</i>

	<p><i>to go to the source. They had discovered that there were many other sources under the ground, these sources came out in the wood.</i></p> <p><u>Testo in italiano del racconto "La sorgente miracolosa"</u></p>
