Practical Activity 7: Upload the video to Internet

Description of the Practical Activity: In this final activity, we are going to upload our video to one of the most famous video streaming platform: Youtube. (<u>https://www.youtube.com/</u>)

The first you need is a Google account. We recommend creating an official account of the school in order to use only for videos and don't depend on a personal account of one teacher.

Once you have logged in Youtube, you can find this icon in the top right side of the screen:

÷(

It opens a section similar to this:

★ Did you know that you can set defaults for future uploads?		Configure defaults X
Select files to upload Or drag and drop video files Public •		OS Import your videos from Google Photos Import
	LIVE STREAM	IING Set up your channel and stream live to your fans Get started
HELP AND SUGGESTIONS By submitting your videos to YouTube, you acknowledge that you agree to YouTube's Terms of Service and Community Guidelines. Please be sure not to violate others' copyright or privacy rights. Learn more Upload instructions Troubleshooting Mobile uploads		

Let's select the video and wait until it is uploaded.

Youtube, once it is uploaded, delays some minutes before you can publish it or edit all the details. This is because they have to enhance the video, convert to their format and check it for inappropriate or illegal content.

While it is uploading, you can change the title, tags and privacity terms. Until you don't click "Publish" the video is private.

Some tips:

Mark de video as unlisted. This options disable the video for search engine and only people with the link or looking into your channel can access.

Basic info	Translations	Advanced settings
